EXPERIENCE

Ether.fi - Top 5 DeFi protocol by TVL (~\$6B)

George Town, Cayman Islands

Data Analytics Lead

2025 – Current

Lead Analytics for the Card (Neobank) product, owning the on-chain and product data layers end to end (SQL, Data Ingestion, Dune, Metabase, Sardine, Grafana, Amplitude).

- Instrument Amplitude from scratch and run Funnel optimization responsible for a 40% lift in conversions.
- Deliver weekly “State of the Business” address to Leadership, bringing business insights and an update on what has gone well and what hasn't. This initiative is a source of key discussions and new revenue lines.
- Sole Analytics Engineer/Data Analyst in the company, building Data Infrastructure and running analysis for Product, Compliance, Legal, CX, BD, Finance, Growth and Leadership. Leveraging AI to deliver what would otherwise take a full data team to accomplish.
- Design and Build Compliance and KYB/KYC analytics, empowering the team to act quickly to improve the customer experience and cover gaps in analyst allocation.

Nubank - largest digital bank outside Asia

São Paulo, Brazil

Senior Analytics Engineer

2021 – 2025

Founding Analytics Engineer for Nubank's Crypto & Blockchain unit, which scaled from zero to Brazil's 2nd crypto trading platform by volume. The Crypto product reached over 5 million Brazilians and processed over 1 Billion BRL in trades annually during my time there.

- Owned the Data Foundation for the Crypto Business end to end, including Processing, Architecture, Ingestion, Monitoring and Governance.
- Built data pipelines using an internal dbt-like tool running on Spark, Scala and Databricks.
- Received the top rating (5/5) in two yearly performance cycles, driving promotions from Associate to Senior.
- Built the system that gave Nubank's Treasury an up-to-date view of the bank's asset allocation. It was used alongside Bloomberg in high-stakes decisions to trade billions of Reais, optimize and derisk the Balance Sheet.
- Built Clojure microservices to ingest data from external partner APIs.
- Built necessary Data Pipelines to take business decisions and comply with evolving Regulatory and Accounting demands.

Alana AI

São Paulo, Brazil

Software Engineer

2020 – 2021

- Maintained Python/AWS infrastructure behind the company's conversational AI;

Obabox

Belo Horizonte, Brazil

Data Analyst
